**PARALLELISM**  
Compiled & Mixed by Alex Dolby & Gare Mat K

Alex Dolby is one of the most consistent in recent years despite the changing fashions and genres has always found a reasonable compromise to stay in this market.

His sound is a deadly mixture of grooves and sounds of inquiry, with a big impact on the dance-floor. Over the years Alex has been supported from renowned DJs such as Sasha, John Digweed, Time Pass, Nick Warren, Hernan Cattaneo and many others.

"My CD is a mix of European sound of the moment, where there are tracks of my favorite producers, including Martinez and Carlo Lio hermanes which never fail in my dj sets. Definitely not easy to express in an hour or so, I love building a dj set of at least 3 hours with one set always grooving with the phases of emphasis where you travel a bit and then up again with the groove.

I have the CD enclosed in an hour a little juice my set today. Now I encourage you to car or lie on the couch and make you this hour of music!"

Gare Mat K, spiritual and transcendental, has been working in the movement of electronic music for well over decade with many of the world's top DJs, recognized promoters and clubs. Having worked with a long list of high profile labels, he has enjoyed top charts success on numerous of occasions.

"My CDmix is a short extraction of the last 2 years of the music influences in my career. A synopsis that goes from emotional and personal things, to the danceables and cheerful, having been traveled through different cultures and the ayahuasca' rituals, as result of a powerful groove and music creativity, building my own sound along with some great producers such as Chata, Telefon Tel Aviv, Sasha Funks, Jeff Bennett, Christian Fisher and Tomo Depth among others."

"A journey through the time, for serious researches of consciousness."

"These two CDs are a snapshot of what's setting our pulses racing at the moment; a selected stuff from close friends, producers and lovely labels!, blurring of the boundaries of great music," says Alex and Gare.
